

## **Biden's executive orders. What do they really accomplish? Not much really.**

Stopping the border wall construction makes sure the MLDs get future illegal residents/voters (they think) while schools, medical facilities, state welfare systems, law enforcement, ICE, border patrol and low income housing will need to either be expanded (job security) or they will be more overwhelmed; as American citizens suffer away.

Revoking travel bans makes sure terrorists can once again easily come to America to make sure it is never great again; as American citizens suffer away.

Stopping deportation and keeping DACA makes sure all of the above also happens; as American citizens suffer away.

Making sure the census does not count illegals also makes sure key MLD strongholds can have things their way during future elections; as American citizens suffer away.

Allowing sanctuary cities to get federal grant funds AGAIN will reward their bad behavior AGAIN; as American citizens suffer away.

Killing the XL pipeline makes sure Buffet and BNSF keep on making money shipping oil with higher risk of spills and pollution and makes sure people who build more effective ways to transport and produce energy, fuel and plastics lose jobs (prices at the pump probably won't change much as not much oil is actually flowing from AB Canada yet anyway); but American citizens will suffer anyway.

Getting rid of the 1776 Commission did nothing much really as their report is still out there for all to read... if they try... but it does allow the 1619 project BS to keep right on brainwashing America's kids a lot easier; as American citizens suffer away.

Going back to the Paris Climate Accord BS won't change anything but will allow China and India to keep right on polluting for 10 more years, while U.S. companies deal with Biden being in charge for a few more years; as American citizens suffer away.

Going back to the WHO won't change much either, except that America will keep on funding them for no good reason; as American citizens suffer away.

Making people wear mask on "Federal property" (owned by We the People BTW) or any of his other Covid-19 BS actions (most of which were already going on thanks to Trump long before Biden came along) won't change a thing either; as American citizens suffer away.

Biden working a nuke deal with Moscow, even though when Trump met with Putin that was "anti-American", won't do much either, that wasn't going to be done had Trump stayed around for another 4 years either; as American citizens suffer away.

And the Biden bull-shit list goes on and on for at least four more years. Patience is virtue, as they say.
